Importance of good crash data:

- Crash data can be used for action planning, monitoring and evaluation.
- Identify risk groups/places/times for intervention focus.
- Target media campaigns.
- Focus road design/infrastructure priorities (black spots and road user types).
- Target enforcement activities.

Objectiv e

- With the objective of improving the crash data collection methodologies and efficient crash data analysis, in Mumbai, Mumbai Traffic Police, have initiated a systematic program trying to incorporate international best practices.

Work Done on crash data analysis

- As a continuing process MTP have partnered with Bloomberg Philanthropies Initiative for Global Road Safety (BIGRS) to improvise the crash analysis.
- **Work done:**
  - Simple data entry platform drafted for fatal crash report summaries
  - Data from summary data sheets entered for fatal crashes, 2015 & 2016.
  - Preliminary data review and analysis completed.
  - Mapping of accident spots for all the fatal crashes in 2015 is completed.
  - New MoRTH form reviewed and based on it a new one page crash data collection form is prepared, which is currently undergoing final review.
